

# California craft cannabis for the hash market.

Appellation-grade cultivation in Mendocino County, paired with authentic Moroccan hash imported through our established partners — every batch sold with verifiable provenance.

**\$5.0M**

# What we do

*Grow it in California. Import it from Morocco. Sell it with proof.*

## What we are building

A premium hash house: sun-grown, appellation-certified cannabis cultivated in Anderson Valley and processed into hash, rosin and pre-rolls — alongside an import line of traditional Moroccan hash.

## Why now

Hash and solventless concentrates are the fastest-growing premium category in cannabis, and Morocco's regulated framework has opened a legal route for traditional hash for the first time.

## Why we win

Justin Calvino founded California's cannabis appellation system. Our Moroccan partners give us heritage product no domestic competitor can copy. Provenance is documented on the Prime Origins platform.

**\$12.6M**

18-mo CA revenue plan

**\$35-44/g**

hash & rosin pricing

**100%**

provenance-documented

# Why hash. Why now.

*The premium end of cannabis is moving from flower to craft concentrates.*

## 01 Hash is the premium category

Solventless hash and rosin command some of the highest per-gram prices in the regulated market — \$35/g hash and \$44/g rosin in our pricing model, versus commodity flower economics.

## 02 Authenticity sells

Appellation-certified, sun-grown cannabis commands roughly a 30% premium over average California outdoor. Terroir, certification and story move product at the top of the market.

## 03 Morocco just opened

The world's most famous hash origin now has a formal regulated export route. Authentic, legally imported Moroccan hash is a first-mover product in premium markets.

## PRICING POSITION

**\$35/g** craft hash

**\$44/g** live rosin

**+30%** appellation premium  
vs. avg CA outdoor

*Pricing from Phase 1 California revenue model.*

*Investor takeaway: we sit at the premium end of the fastest-growing category, with two origins of supply.*

# Two supply engines. One brand.

*Domestic craft production plus imported heritage hash.*

## CALIFORNIA • CULTIVATE

### Vista Ranch, Anderson Valley

- 60,000 sq ft licensed canopy — full-term outdoor and hoop house
- Navarro River Cannabis Appellation — certified sun-grown terroir
- Regenerative methods: smart pots, engineered soil, watershed restoration
- 2,094 lbs bud + 837 lbs trim projected — graded into flower, rosin, hash and pre-rolls

## MOROCCO • IMPORT

### Traditional Moroccan hash

- Established partner farms operating inside Morocco's regulated framework (ANRAC)
- Centuries-old craft: the world's most recognised hash origin
- Documented chain of custody — COAs, batch records, export files
- A heritage product line domestic competitors cannot replicate

*One brand, two origins: California craft and Moroccan heritage — both sold with full provenance documentation.*

# California production — Phase 1

*60,000 sq ft, two-track cultivation built for the hash market.*

## Full-term outdoor

Appellation certified

**594 lbs**

297 plants · smart pots · engineered soil · est. 2 lbs per plant

## Hoop house

Protected cultivation

**1,500 lbs**

Extended seasons · environmental control · consistent hash-grade material

**Total projected harvest: 2,094 lbs bud + 837 lbs trim — graded so every pound has a destination:**

Larges · 30%

**628 lbs**

→ quarter-oz flower jars

Mediums · 40%

**838 lbs**

→ rosin & concentrates

Smalls · 30%

**628 lbs**

→ hash & pre-rolls

Trim · +40%

**837 lbs**

→ hash & pre-rolls

# The Moroccan hash line

*Authentic product, regulated route, established partners.*

1

## Partner farms

Long-standing relationships with cultivators in Morocco's traditional hash regions.

2

## Regulated framework

Operations run inside Morocco's formal legal-cannabis framework administered through ANRAC.

3

## Documented export

Batch records, certificates of analysis and chain-of-custody files travel with every shipment.

4

## Premium placement

Imported heritage hash positioned alongside our California line in licensed channels.

## Why it matters

Moroccan hash is the most recognised name in the category, and a legal import route is brand-new. Securing supply, documentation and shelf placement first creates an advantage that compounds — while diversifying us beyond a single harvest or geography.

# Phase 1 revenue plan — 18 months

*California operations alone support the plan. Moroccan imports are upside.*

## Pre-rolls

398,931 units @ \$13

\$5.19M

## Rosin & concentrates

56,991 g @ \$44/g

\$2.51M

## Craft hash

66,489 g @ \$35/g

\$2.33M

## Quarter-oz flower jars

40,203 units @ \$56

\$2.25M

## Agritourism & seeds

farm stays, workshops, genetics

\$0.29M

**\$12.6M**

from cultivation products

+

Moroccan import revenue not yet modelled — pure upside

*Volumes and pricing from the Vista Ranch Phase 1 cultivation model (2,094 lbs bud + 837 lbs trim). Projections are illustrative, not guaranteed.*

# Every batch carries its proof

*Prime Origins is more than a farm — it is a provenance platform.*

## Product passports

Each batch is logged on the Prime Origins platform with certificates of analysis, origin data and ESG records — traceable from seed to shelf.

## Direct to buyers

primeorigins.org connects verified producers directly with global buyers, cutting intermediaries and protecting margin.

## Carbon & ESG value

Regenerative practices feed Prime Origins Atlas, our carbon-credit marketplace — turning sustainability into a second revenue story.

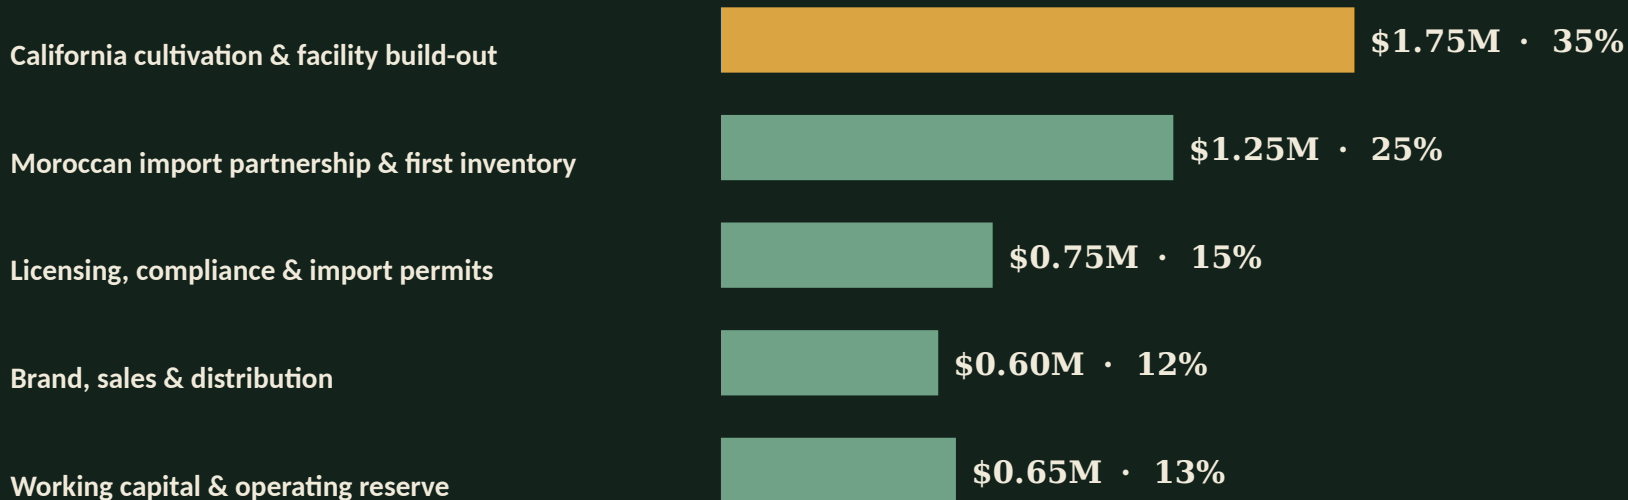

## Why buyers care

Serious buyers want proof: COAs, batch records and chain of custody. Our products ship with all three by default — the documentation standard is built into the brand, not bolted on.

# Where the \$5.0M goes

*The round funds production, first import inventory and the route to revenue.*

*Designed to create evidence before the next capital commitment: licences secured, crop planted, first import landed, first sales documented.*

# Execution roadmap

*Four phases from funding to a scaled, two-origin hash brand.*

## M1-3

### Secure

Close the round, finalise licences, prepare Vista Ranch for planting, sign Moroccan import agreements.

## M4-9

### Build & grow

Plant and cultivate the first full season; complete processing infrastructure; first Moroccan shipments documented and landed.

## M10-18

### Sell

Harvest, grade and process into hash, rosin, jars and pre-rolls; launch both product lines into licensed retail.

## M18+

### Scale

Expand canopy and import volumes, deepen retail relationships, grow the provenance platform across both origins.

*Each phase produces diligence evidence — licences, planting records, import files, COAs, sales data — before the next commitment of capital.*

# Leadership

*Founders, board and technology — under one roof.*

## CO-FOUNDERS

### Oliver Triggs

Chief Executive Officer

12+ years in corporate finance including BDO Corporate Finance; led land and hemp ventures across Africa. Drives strategy and the investor pipeline.

### Justin Calvino

Partnerships, Licensing & Ops

10+ years in California cannabis; founder of the Mendocino Appellations Project, co-founder of Emerald Exchange. Leads partnerships, licensing and operations.

### Grant Robshaw

Chief Financial Officer

15+ years across Deloitte, KPMG Bermuda and Conyers. Leads financial structuring, governance and the Moroccan partner relationships.

### Victor Cornejo

Infrastructure & Ops

20+ years delivering regulated cannabis and industrial facilities — compliance, scalable manufacturing and technology-driven execution in high-scrutiny environments.

## CHAIRMAN & TECHNOLOGY

### Rene Schuster

Chairman

CXO with 25+ years at KPMG, Telefónica, Vodafone, HP and Compaq; expert in turnarounds, digital transformation and growth across tech, telecoms, IT, media, retail and healthcare.

### Patrick Hale

Chief Technology Officer

Crypto native — launched his first blockchain venture at Stanford, advised global brands and delivered multiple nine-figure tokens. CEO of DreamTech Consulting.

# The investment opportunity

*\$5.0M to build a two-origin premium hash brand.*
